Capita

Growth Hub

Sales Accelerator

25 March 2020

How do we <u>quickly</u> make the boat go faster?

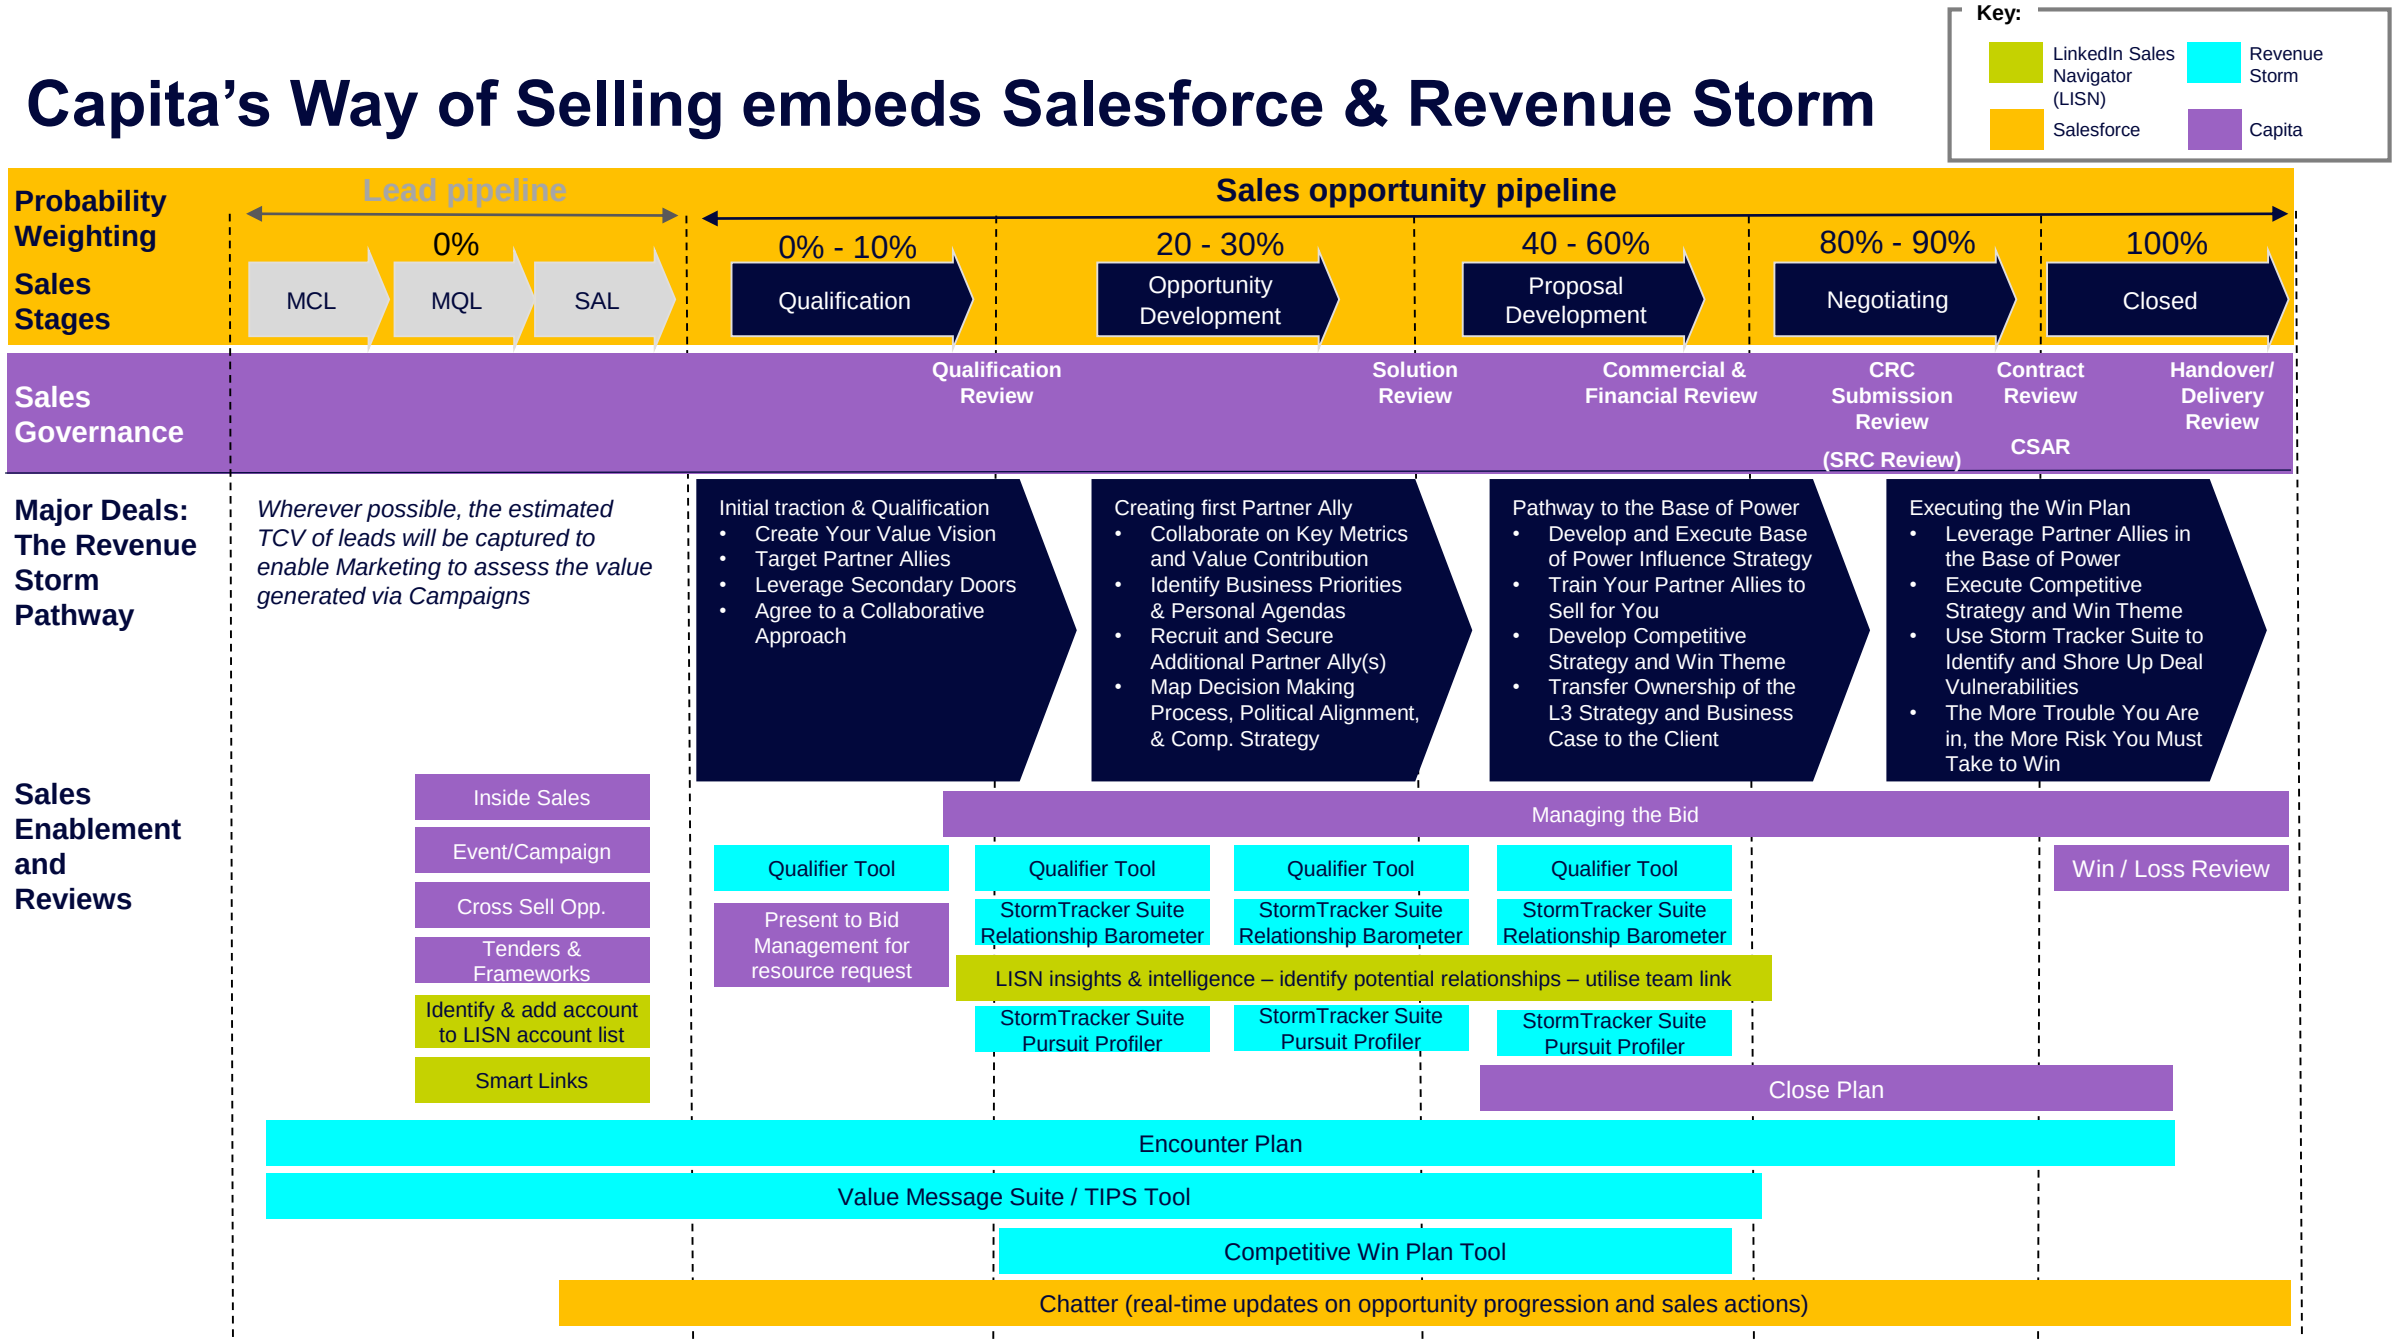
Confidential. For internal use only

Growth Hub – Sales Accelerator

- Increases sales momentum and velocity
- Supports capture of in-year revenue
- Uses Revenue Storm tools to keep it real
- Increases effectiveness through repeatability and predictability
- Delivers a growth drum beat – weekly cadence

Confidential. For internal use only

Capita's Way of Selling embeds Salesforce & Revenue Storm



We deliver purpose-led, better outcomes for our Clients. This is powered by our Growth Hub, which enables world class sales performance

Growth Hub – virtual team

Opportunity Origination		Bidding & Closing 'Deal Hub'		Colleague Support	Central Growth Ops	Divisional Capabilities
Account / Industry Development Planning	Go to Market via Strategic Partner Alliances	Opportunity Qualification	Knowledge & Collateral Curation	Recruitment	Growth Function Planning & Reporting	Consulting

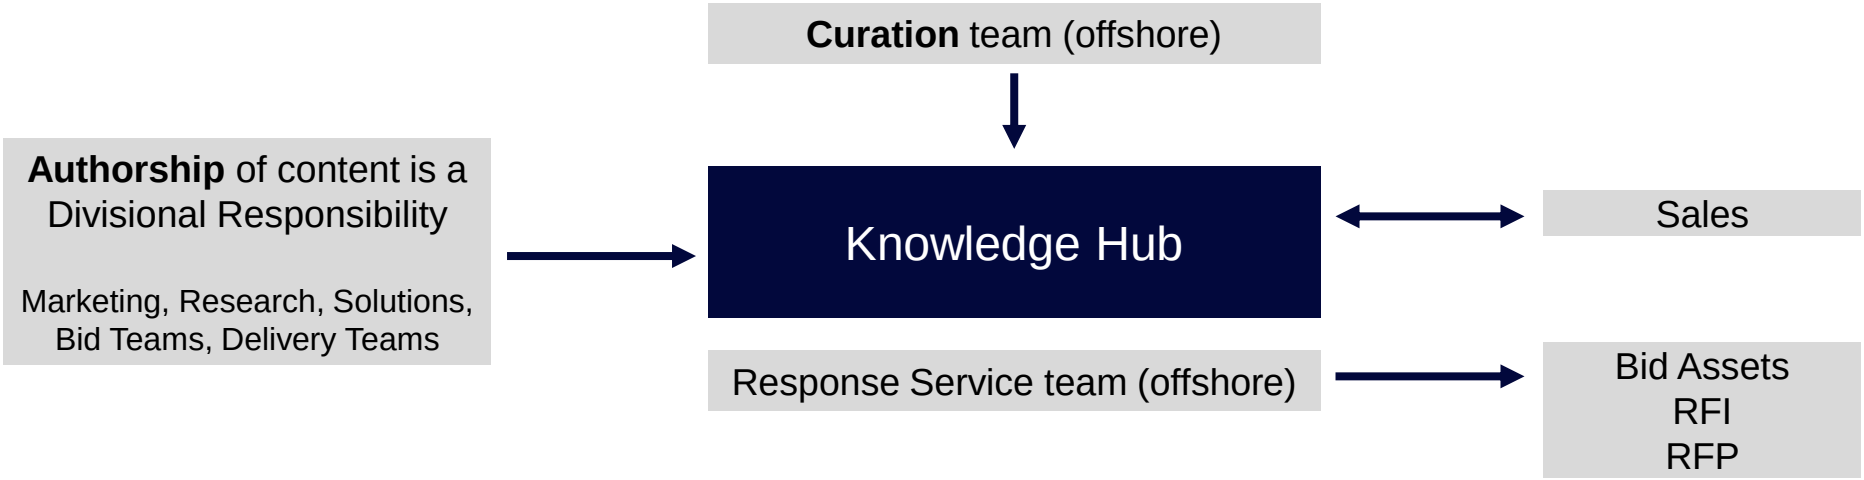
Sales Coaching	Deal, Solution & Commercial Coaching	Mentoring	**Growth Playbook**

Revenue Storm Tools	Salesforce	Knowledge Hub	**Sales Enablement Platform**	Digital Sales Assistant	Digital Bid Assistant	Partner Content (e.g. IBM, Microsoft)

We propose to create a Knowledge Service that enables our bid teams to focus on the client, the quality of our proposals and winning

Central Knowledge Team Remit:

- **Curating** – work with divisions to get content into the Knowledge Hub (SharePoint) and to ensure meta data and tagging
- **Maintaining** – librarian function to ensure content currency and usage
- **Responding** – populate RFI and RFP response documents with standard information
- **Advising** – Share best responses to questions with bid teams pulling from across Capita



We know what the simple, practical steps are to deliver world class bids and have embedded these into our Bid Methodology

1 Mobilise to win

We are constructively challenging. We validate whether we have a thorough understanding of the opportunity, and how and why we think we can win. To effectively mobilise we commit to the bid costs and to releasing the resources required for pursuit. We assign an Executive Sponsor and a Deal Coach as well as identifying a delivery lead to become part of the team

2 Early development of the proposition (the solution and business case)

We may not have all the information we need, but using our experience, industry insights and reasonable assumptions. This allows us to share and test our thinking with the client and with colleagues, with time to benefit from the feedback we receive. We iterate this process through the pursuit to evolve the proposition, progressing this into the best option and focusing on how we can assure its delivery for the client, and Capita

3 Collaborate and engage with the client so they think its their proposition

We broaden and deepen our relationships with the client, partners and advisers understanding their agendas and goals. We prepare, prepare, prepare for every interaction, testing our proposition and landing our sales messages. Everyone ‘in the room’ know what we want to achieve, how to conduct themselves, what their role is and what we’re looking for from the client – we listen and watch carefully

4 Plan for success, through structure and organisation

It is critical to communicate with the team to inform and enthuse them, particularly where it is an extended pursuit. We plan from right to left, putting clear milestones in place to make sure we’re on track. At every step along the way we focus on required outcome using regular checkpoints to ensure these will be achieved. We prepare for the rigours of governance, proactively engaging key stakeholders, enabling Executives to make informed decisions

5 Quality first, embrace coaching and peer reviews

We analyse the available priorities, scoring and evaluation criteria feeding this and our win themes into our strategy for winning. We develop storyboards and structures for responses to provide a consistent approach for our writers. We review regularly with coaches and peer reviewers to enhance quality. We work with marketing on innovative designs and, where possible, different digital formats

Summary of recommendations and actions required

1. Promote use of Chatter by ExCo to increase Salesforce adoption (e.g. asking Sales Leads about key meetings and next action)

2. Establish Knowledge Service – we have a 10 week plan to achieve this

   - People Solutions to be the first mover and create the foundation followed by all Divisions (see page 14)

   - Requires resources to be assigned and empowered to move at pace (see page 15)

3. Establish a world class bidding capability

   - To embed sales excellence, define and promote world class performance when we're bidding, we recommend a number of practices are established, which are led by practitioners 'player/coaches' (see page 17)

   - Developing world class sales performance requires investment in our Bid Methodology (see page 20) with supporting assets, such as templates, best practice guides and tools (as illustrated on pages 21 and 22)

Creating the Bid ‘Factory’

Knowledge Services

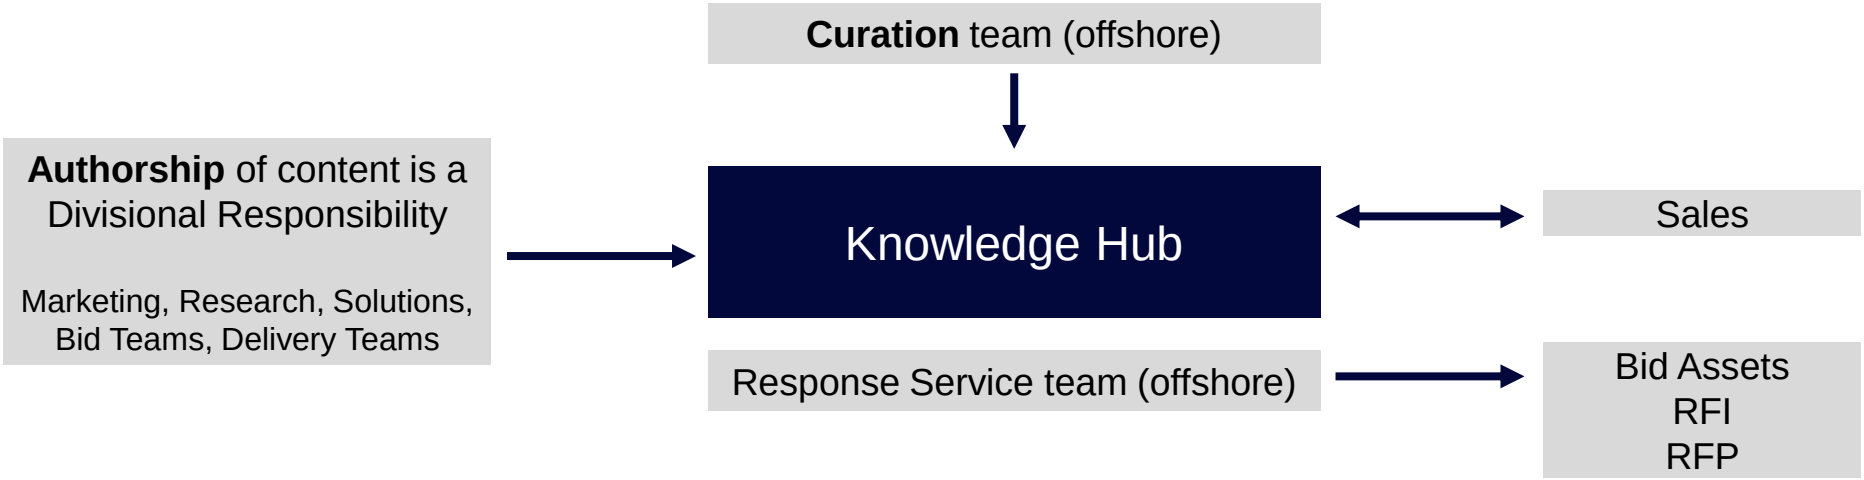
The key principles for the Knowledge Service

- Supporting bid and sales teams with best content to drive improved deal velocity
- Enabling local bid resources to be focused on the work that physically needs to be done ‘in the room’ and with the client
- Sharing core sales assets including, customer and client insight and presentations, bid FAQ, bid best practice and sales collateral
- Driving consistency across Capita
- Relying on Divisions/Functions for authorship – content currency is vital to the sustainability of the service
- Focusing on the curation of materials, driving timely reviews of content and delivering initial response materials and collateral to support bid teams
- Identifying trends, gaps and ideas for continuous improvement to the Divisions/Functions

We propose to create a Knowledge Service that enables our bid teams to focus on the client, the quality of our proposals and winning

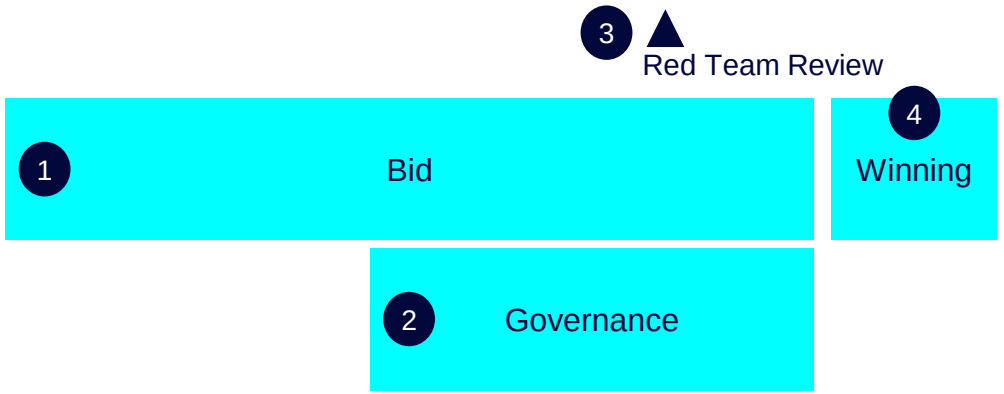
Central Knowledge Team Remit:

- **Curating** – work with divisions to get content into the Knowledge Hub (SharePoint) and to ensure meta data and tagging
- **Maintaining** – librarian function to ensure content currency and usage
- **Responding** – populate RFI and RFP response documents with standard information
- **Advising** – Share best responses to questions with bid teams pulling from across Capita

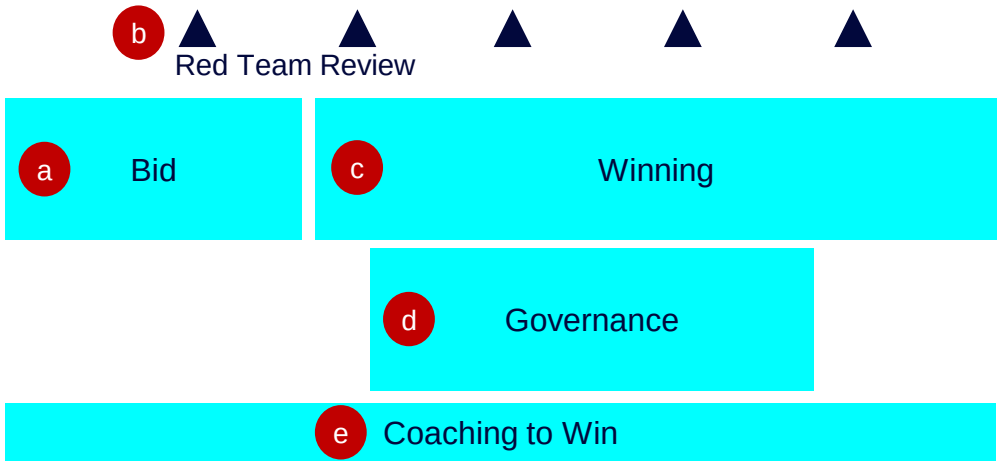


The Knowledge Service business outcome is accelerating proposal development and will enable teams to focus more time on winning

From



To

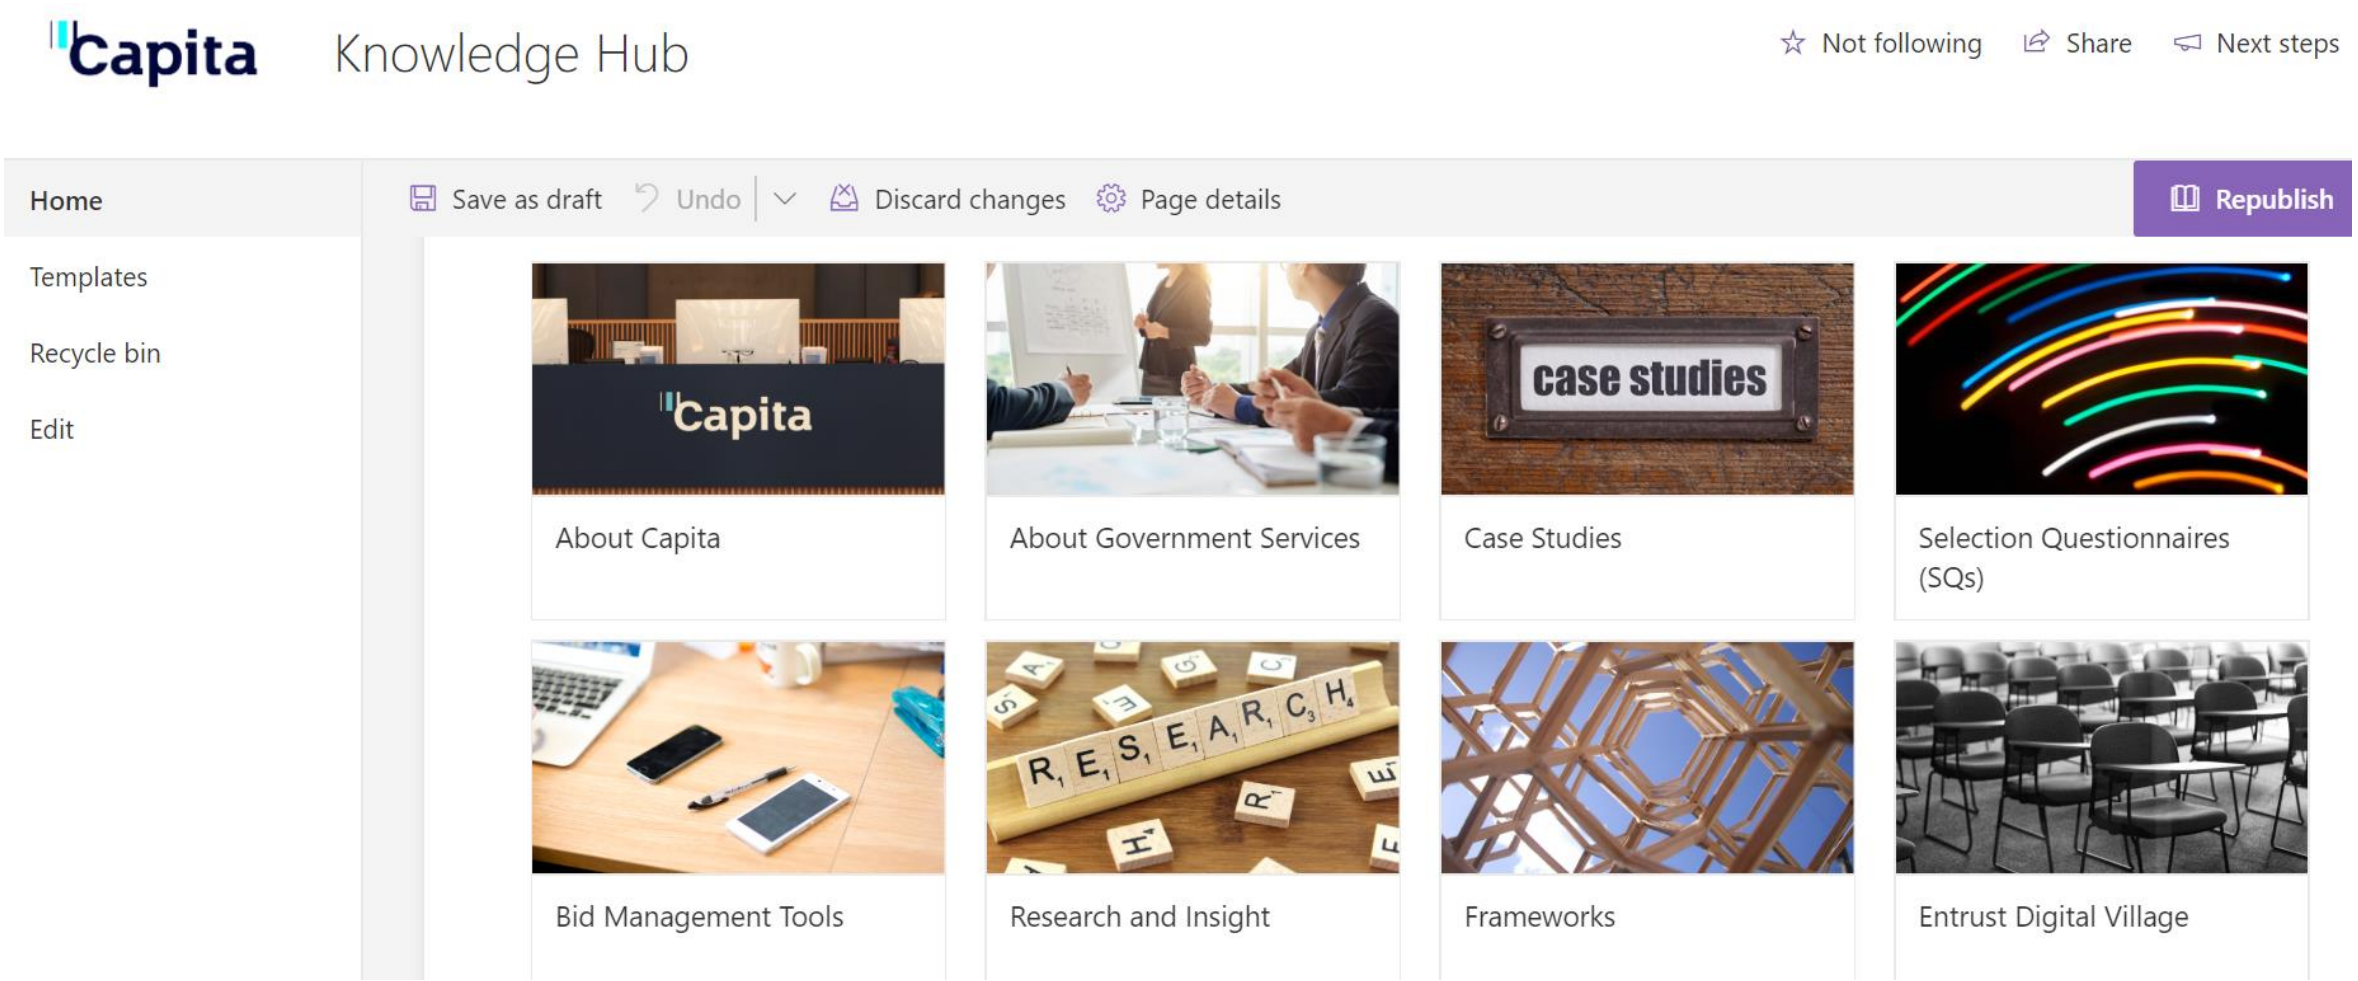


1. Win themes are created, but the focus is on searching for material and writing responses
2. Focus of core sales team moves to preparing for and executing governance
3. Peer Review process waits until substantial progress has been made on the responses
4. Time spent finessing the responses ready for the submission e.g. pull through of win themes, finalising the Executive Summary

a. Win themes tested with the coach whilst the Knowledge Service provides high quality pre-populated response (60% to 80%) – time spent ‘gap filling’
b. Early start on a series of Red Hat reviews, allowing deep dives into key areas of the response to drive quality
c. More time to focus on creating a winning response; navigation, messaging, sign-positing, win themes, differentiation
d. Focus of the core sales team moves to preparing and executing governance; greater clarity for the Executive on how we will win
e. Bringing insights, practical experience and best practice to support the team to develop compelling, differentiated, high quality and winning proposals

Confidential. For internal use only

For pace, the Knowledge Hub will be created in SharePoint adapting what is in place today for Government Services



Basic Hierarchy cloned and refined by resource with limited SharePoint knowledge in less than 2 days of effort **People Solutions**

We can be up and running in 10 weeks with the initial Knowledge Service for all Divisions

Proposed Next Steps

High level 10 week delivery plan – we could be up and running in June if we started next week

Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9	Week 10

Sprint 1 – People Solutions

- Sign-off of Capita architecture and hierarchy for the Knowledge Hub in SharePoint
- People Solutions SharePoint build complete
- People Solutions Comms Plan defined
- Initial India capability in place
- Initial Taxonomy signed-off and curation procedures in place
- Sign-off of design of the Capita Response Service
- Initial content loaded and curated
- Go-Live of the People Solution Knowledge Hub, curation capability and Response Service (Division determines extent of content to be released at this time)

Test & Learn

Time to make amends to the Knowledge Hub and/or Response Service before full go-live

Sprint 2 – Remaining Divisions

- Divisional leads in place, each with responsibility to manage the identification and load of relevant content to the Knowledge Hub

  Divisions commence activity to identify requirement, available content, updates/gap fill where required

  6 week sprint to get initial content ready
- All Divisions SharePoint builds complete
- Sign-off of Capita company information and content
- Sign-off of initial CVP content
- Comms Plan and procedures defined
- Load of initial content completed
- Content identified by the Divisions as ready to use is loaded to the Knowledge Hub and has been curated
- Review of lessons from the People Solutions go-live – applied where relevant
- Go-live of the Knowledge Hub and Response Service (Divisions determine extent of content to be released at this time)

Once the full Initial Knowledge Service has been in place for about 4 weeks, a Project Report will be issued to summarise key learnings and to make recommendations on additional capabilities (e.g. use of AI/automation) and services (e.g. scaling the Response Service) that should be considered, which will be discussed and agreed at the GLT

What we need to achieve the proposed initial Knowledge Service

The timescales set out below assume that we will commence the project w/c Monday 30 March

Need	Description	Estimate	When By	Who Owns
Executive Sponsor	The Executive Sponsor will drive the project to get the initial Knowledge Service in place, working on behalf of the DGDs. They will lead weekly progress meetings and resolve escalations to maintain momentum	2 – 3 hours a week	Friday 27 March	To be assigned by the GLT Proposal: Martin Prescott
Project Lead	The Project Lead will be responsible for driving the project to establish the initial Knowledge Service. They will work with the DGDs (or delegates) to secure resources, ensure decisions are made to time to maintain the schedule, drive the action plan, reporting progress and escalate issues to the Executive Sponsor in a timely manner for resolution	Full time for the initial 10 week period	Friday 27 March	To be agreed at the GLT Proposal: Stuart Wright
SharePoint Expert	The SharePoint Expert will advise on the SharePoint architecture and hierarchy, building on what is in place for Government Services currently. They will assist in setting up the sites, loading content, the development of operating procedures and training materials. Work underway to see what capability we or Microsoft have (without cost) to assign to this	20 days over the initial 10 week period	Monday 30 March	To be agreed at the GLT (Matt Harding has been involved previously)
Divisional Leads	Each Divisional Lead will be empowered to: • define requirements that best meet the Divisions need (e.g. common RFI/RFP questions) • identify existing content and judge the quality of the content • agree with the DGD any actions to update content to improve quality and/or fill identified gaps • work with the load SharePoint Expert to load content to the Divisions SharePoint site • work with the Project Lead to develop a Division specific plan and to report progress against it to agreed timescales	Will vary depending on existing content – up to ½ time during the initial 10 week period	Friday 27 March	To be assigned by each DGD DGD to communicate assignment to individuals
Capita Content Lead	The Capita Content Lead will be empowered to work with the Divisional Leads with a specific focus on common Capita level requirements, rather than a Division. They will identify content, judge whether it is adequate and propose actions to the Project Lead in terms of improving quality and/or gap filling. As per the Divisional Leads they will work with the SharePoint Expert to load the content and with the Project Lead to develop the plan for this area of content.	Effort minimised if the proposal is accepted	Friday 27 March	To be agreed at the GLT Proposal: Jess Keane
Bid Writers	We anticipate the most significant requirement across the Divisions will be to improve the quality of content. We do not have a bench or depth of capability in this area and therefore propose that the Divisional Leads work with their DGDs to develop a plan to improve content over time, targeting specific bids to achieve this	Will be determined by the Divisions	N/A	DGDs
Offshore Resource	People Solutions has a budget for 3 offshore FTEs and are willing to ‘donate’ these to create the Initial Knowledge Service. Any subsequent capacity / future services will require additional funding from the Growth Function	TBC	Post Launch	Project Lead to co-ordinate development of recommendation for GLT

Bid Methodology

We propose to establish a number of ‘Practices’ within the Deal Hub to embed sales excellence and promote world class performance

Bid Management Practice

- Defining the Bid Methodology (including tools and best practices)
- Communicating and embedding the Bid Methodology
- Developing a Bid Management Community across the business, supporting talent development
- Accrediting Bid Management coaches and peer reviewers (and maintains central list)

Solution Practice

- Defining the Solution Methodology (including tools and best practices)
- Embedding and communicating the Solution Methodology
- Developing a Solution Community across the business, supporting talent development
- Accrediting Solution coaches and peer reviewers (and maintains central list)

Deal Architect Practice

- Defining, communicating and embedding best practices
- Developing a Deal Architect Community across the business
- Accrediting Deal Architect coaches and peer reviewers (and maintains central list)

We do not envisage these being full time roles, rather **allocated to practitioners who will be ‘player / coaches’**

We know what the key ingredients are to achieve sales excellence and be world class when bidding

	Qualifying the Bid	Managing the Bid	Developing the Proposition	Creating Materials & Proposals
Key features & attributes	An **informed decision** to bid/or no bid is made, using evidence that is based on facts and data combined with the professional judgement of sales that provides an **objective assessment** of whether an opportunity is: • **attractive** in terms of risk and reward • **aligned** to our group strategy • **winnable** considering the known or potential competition • likely to conclude. **Revenue Storm tools** have been utilised and there is **clarity** on: • **what** the opportunity is and its scope • how well **connected** we are with the client and key **stakeholders** • the strategy to **defeat** the **competition** • the **proposition** (high level solution and business case) and its risks • the forecast **cost** to bid and what sales and delivery **resources** are required • what the **next steps** are.	We create **high performing** and **collaborative teams covering sales and delivery** with a **common goal** of **winning** for Capita. Our approach: • **engages and enthuses** the team so deadlines are continually achieved and delivers **structure, order** and **control** • evolves **win themes**, using new knowledge and insights to sharpen them and ensure they are distinctive • maximises every client interaction to **broaden and deepen our relationships**, and understanding • **accelerates** the design of the proposition, to provide time to test and validate it with the client, improve it and to focus on how we will safely implement it • uses **coaches** to bring new ideas and **peer reviews** to assure quality • **plans** for success; we prepare for every meeting focusing on the outcome • involves internal stakeholders and **enables informed decisions** • continually **learns** from each deal.	**Solution** We deliver **compelling, creative solutions**. Working **collaboratively** with clients, partners and Capita colleagues we design solutions using **privileged** client knowledge, **industry insights**, **innovations** and **proven** capabilities. It is clear **how** the solution: • meets requirements (solves problems/realises opportunities) • will be 'safely' implemented • is distinctive from the competition • has been aligned with the evaluation criteria – we know how we expect it to score. **Commercial** Our **outcome** based commercial proposal delivers genuine **financial advantage** for the client. It delivers the **certainty** that the client is seeking as well as providing a range of **added value** ideas to enhance the benefits. Applies **rigour** to our pricing, how we **validate** our proposal through Due Diligence and to **risk assessment**.	Everything that we produce during the bid lifecycle, must deliver an **experience,** not just words. It should **resonate** with the audience, utilise different **digital** formats, be **visually** appealing and **easy** to read. Specifically for proposal responses: • **signpost** clearly where each question is answered and present responses in a **structure** the reader expects • make it **easy** for the reader to evaluate against any criteria • use simple, concise, active and positive **language**, highlighting **key messages** • embed **win themes** and show **how** they are achieved • are **complete**; don't assume knowledge or that the reader has access to the whole document. Our Executive Summaries are **bold**, written as we speak to **concisely** set out the real **challenges**, our **insights**, the **value** we will deliver and **evidence** of **how** we will achieve this.
Coaching to Win	**Revenue Storm**			
	Sales Coaching	**Deal Coaching**		

We know how to turn these ingredients into simple, practical steps to deliver world class bids

1 Mobilise to win

We are constructively challenging. We validate whether we have a thorough understanding of the opportunity, and how and why we think we can win. To effectively mobilise we commit to the bid costs and to releasing the resources required for pursuit. We assign an Executive Sponsor and a Deal Coach as well as identifying a delivery lead to become part of the team

2 Early development of the proposition (the solution and business case)

We may not have all the information we need, but using our experience, industry insights and reasonable assumptions. This allows us to share and test our thinking with the client and with colleagues, with time to benefit from the feedback we receive. We iterate this process through the pursuit to evolve the proposition, progressing this into the best option and focusing on how we can assure its delivery for the client, and Capita

3 Collaborate and engage with the client so they think its their proposition

We broaden and deepen our relationships with the client, partners and advisers understanding their agendas and goals. We prepare, prepare, prepare for every interaction, testing our proposition and landing our sales messages. Everyone ‘in the room’ know what we want to achieve, how to conduct themselves, what their role is and what we’re looking for from the client – we listen and watch carefully

4 Plan for success, through structure and organisation

It is critical to communicate with the team to inform and enthuse them, particularly where it is an extended pursuit. We plan from right to left, putting clear milestones in place to make sure we’re on track. At every step along the way we focus on required outcome using regular checkpoints to ensure these will be achieved. We prepare for the rigours of governance, proactively engaging key stakeholders, enabling Executives to make informed decisions

5 Quality first, embrace coaching and peer reviews

We analyse the available priorities, scoring and evaluation criteria feeding this and our win themes into our strategy for winning. We develop storyboards and structures for responses to provide a consistent approach for our writers. We review regularly with coaches and peer reviewers to enhance quality. We work with marketing on innovative designs and, where possible, different digital formats

Our bid methodology is flexible in its application, recognising the Divisions participate in a variety of procurement processes

Sales Opportunity Pipeline

Sales Stage

Qualification

An informal Initial Qualification Review assesses an opportunity. If accepted, resource is assigned to develop the thinking. A Qualification Review decides whether to bid/no bid.

- Opportunity added to/updated on Salesforce – 0%
- Complete the Deal Card – align data with Salesforce
- Initial Qualification Review Meeting Progress or not?
- Update Salesforce – 10%
- Required resources are assigned
- Develop the Initial Sales Strategy
- Develop the Opening Proposition
- Complete the Qualification Review deck
- Qualification Review Meeting Bid or Not? Assign Deal Coach & Executive Sponsor

Sales Coaching to Win

Opportunity Development

An informal Initial Qualification Review assesses an opportunity. If accepted, resource is assigned to develop the thinking before a Qualification Review is conducted to decide whether to bid/no bid.

- Set-up the Bid Repository and populate with standard templates, checklists & tools
- Bid Team assigned (& facilities arranged as appropriate)
- Develop Bid Plan (including internal stakeholder engagement, governance & prompts to maintain Salesforce)
- Evolve the Sales Strategy; win themes, stakeholder research & competitor analysis
- Develop the Executive Summary
- Bid Team Kick Off Meeting

Proposal Development

The phase where we test and refine our proposition to ensure it can address the client's needs/requirements via a formal proposal. The proposal clearly details Capita's value proposition and our differentiation from the competition

Develop the Proposition (solution & deal architecture)

- Refine
- Coach to Win
- Refine
- Test with Client
- Refine
- Red Team Reviews

Best Proposition → Validate (via dialogue & with available data) → Updated Best Proposition

Develop the Response

- Develop & evolve the storyboard
- Analyse the bid response requirements
- Team develops responses
- Develop a strategy to maximise score v evaluation criteria
- Develop a bid format & structure to follow
- Red Team Reviews (including deep dives)
- Develop response design
- Allocate questions to individuals (RAT)
- Refine & finalise responses

- Develop client engagement strategy and plan (e.g. for Dialogue, marketing)
- Plan & execute internal stakeholder engagement
- Conduct governance meetings

Submit Proposal (could be a number of submissions overtime)

Deal Coaching to Win

Negotiating

The Opportunity is very nearly won with the final contract 'red lines' in progress with no showstoppers identified

- Update Salesforce
- Develop the close plan
- Develop a negotiation strategy
- Conduct contractual Due Diligence
- Refine & update proposition to result in a Closing Proposition
- Conduct governance meetings

Deal Coaching to Win

Close

The sales process concludes and the Opportunity is won or lost. Where it is won, there is a handover from sales to delivery

- Update Salesforce
- Plan for & complete handover to the delivery team
- Conduct Lessons Learned Review & document findings
- Close Bid Repository site
- Contribute collateral to the Knowledge Hub

The requirement, timing and sequence of activities will vary depending on the procurement process

Activity	Set-up the Bid Repository and populate with standard templates, checklists & tools
Outcome	Delivers collaborative working for the team and establishes controls to be used for the duration of the pursuit

Description of the Activity

A key activity that establishes a single site that all members of the bid team will use to access and store documents and material, and to put in place the core bid management toolset that will be used throughout the procurement process. All of this enables:

- organisation – everyone should be able to quickly locate the content that they need
- communication – a number of communication channels exist and it is down to the team to determine what works best for them in the context of the pursuit, considering its duration, the use of external partners, experience and preferences of the team
- control – versions of documents and materials, across the different phases of the procurement, are effectively managed

Utilising a standard approach, tailoring the set-up where appropriate to the opportunity, will enable bid teams, coaches and reviewers to work more effectively and quicker. It also has the benefit of allowing colleagues to look back at bids, whether they are conducting an audit or looking for relevant information to support operational delivery or another bid.

Available Assets

Templates & Tools	Processes, Guides & Services	Best Practices
• Bid Plan • Actions Log • Capita Clarification Log • Client Clarification Log • Contacts & Absence • RADIO Log • Key Documents Checklist		• Get the site set-up early to establish and promote the desired ways of working

DRAFT as an EXAMPLE

Activity	Bid Team Kick-off Meeting
Outcome	To mobilise the team, getting everyone up to speed with what's happened to date, what needs to be done and how we'll work together for success

Description of the Activity

Effectively engaging colleagues from within the Lead Division, across the Capita group and partners/third parties is critical to winning a deal.

Consider covering the following in the Kick-off Meeting:

- Opportunity Summary and Background – what it is and how we've arrived at this point
- Client Deep Dive – what we know about the client and key stakeholders
- Opportunity Deep Dive – what we know about requirements, priorities, scope, evaluation criteria and the response itself
- Sales Strategy and Win Themes – our value proposition and how we are differentiating ourselves from the competition
- Outline Proposition – the high level solution and commercial proposition that we've put together to date
- Pursuit Team & Ways of Working – who's who in the team and all the logistics of how it will work together

Depending on the nature and timescales of the opportunity, consider whether any break-out groups would be useful as part of the Kick-off Meeting. For example, on a large deal it might be a useful to breakout into key workstreams so they can do a deeper-dive on requirements, strategy to win, roles and responsibilities etc.

Available Assets

Templates & Tools	Processes, Guides & Services	Best Practices
PowerPoint Template – Kick Off Meeting Within the materials, include and draw on the Revenue Storm tools that have been developed to date, for example: • Origination Tool • StormTracker Suite – Relationship Barometer and Pursuit Profiler • Competitive Win Plan Tool	None	• Try not to don't invite colleagues to the Kick-off Meeting 'cold'. Where possible, take time to make sure everyone knows that they have been assigned to the Bid and what role they are expected to perform • It is good to get everyone together, physically or virtually, but don't wait too long to hold this key meeting • Don't forget to spend time on ways of working. Test ideas, get feedback and reach decisions to ensure everyone is bought into how the pursuit will be run • The Kick-off Meeting is a great opportunity to demonstrate how the team will be run – be open, invite questions, take suggestions positively, make sure the materials are high quality (set the bar on expectation)

DRAFT as an EXAMPLE

Capita
